

Wisconsin Lions Camp

Health Care Information

Blind or Visually Impaired Adult Session

Our Health lodge and our Healthcare Staff are ready to make sure you stay healthy during your stay at Camp! Our team consists of at least two Licensed Healthcare Staff who stay for the week, 2-3 Healthcare Specialists who assist the licensed staff, and our Healthcare Supervisor, Amanda Dehli.

- **General Information:**

- The health lodge is open from 7 am – 10 pm with a Licensed Healthcare Staff on call each night from 10 pm – 7 am for illness or injury.
- Medication administration times are scheduled around meals and the camp schedule. Regular times are 8 am, noon, 6 pm and 8:30 pm.
- In emergencies, we are served by Rosholt Area First Responders and Stevens Point ambulance service with paramedics. We have several staff who are First Responders. The hospital we use is Aspirus St. Michaels and our Medical Director who works with us to approve our healthcare standing orders, policies and procedures is Dr. Trina Daniels, who is the Medical Director of the Emergency Room at St. Michaels.
- If you experience a fever, vomiting, diarrhea or other symptoms of a contagious disease within 72 hours of Camp time, please notify us immediately to discuss your camp attendance.
- If you experience symptoms of a fever, vomiting or diarrhea that lasts more than 12 hours here, we will send you home from Camp.
- We strongly encourage you to bring a labeled, reusable water bottle, sunscreen and bug spray to have to Camp to stay hydrated and protect yourself from the sun and bugs.
- The Wisconsin Lions Camp does not carry any type of medical insurance for our campers. You are responsible for any and all medical costs incurred for any urgent care or emergency room treatment while at Camp.

- **Required Forms:**

The following forms **must** be at Camp by May 16. **We will cancel any camper who does not have their forms in by the deadline.**

- A health history form, to be filled out by you or your legal guardian annually for up-to-date health information. This is automatically sent to you via email or by mail six weeks prior to your attendance to ensure your health information is up-to-date for Camp.
- A physical examination form, based on an exam dated after August 2, 2023 filled out by a licensed MD, PA or NP must be on file. This is only due if it is sent to you in your confirmation packet – exams are good for 24 months. We are happy to fax the physical form to your provider and have them fax

the completed form back to us. You'll need to call your provider to get their fax number and call Michelle in the office with that number to get that process going. Physicals must be faxed or mailed to us; we are unable to upload them into our camper database.

- All follow-up forms such as diabetes, seizure, mental health concerns, anaphylaxis allergy or asthma questionnaires need to be filled out to give us detailed information about the condition as well as educate staff on how best to care for you at Camp.
- A waiver form, to grant permission for medical treatment and care. On this waiver form, you'll decide if you wish to take your own medication or have the health lodge administer medications to you.

- **Hold Harmless Option:**

- Decide if you will be taking your own medications, which is called hold harmless at Camp. Hold Harmless means that the camper is responsible for their own medication administration. It is for campers who can independently manage their medications. The medications may be stored in the Health Lodge if you wish, but it is up to you to come to take them at the appropriate time. Signing the Hold Harmless section on your waiver removes the responsibility of those medications from the Health Lodge.

- **Pre-Camp Calls:**

- Our licensed healthcare staff will call you the week prior to Camp to update your health information and ensure we have everything to care for you in the health lodge. This helps speed up check in at registration.

- **Prescription Medication:**

- If you wish for the health lodge to administer your medications, please turn in all prescription medications to the health lodge. All medications must be in the original container with your name, dosage and times clearly stated. If any information is missing, or the dosing was changed without updating the prescription label, we cannot administer that medication. Please consider which medications are necessary for the week you are at Camp and plan accordingly by only bringing what is needed plus one or two extra.

- **Vitamins and Supplements:**

- Vitamins and supplements are accepted in the health lodge. They must be in their original containers with your name clearly written on the bottle. We cannot administer any supplements that contain any CBD, THC or essential oils products.

- **Over the Counter Medications:**
 - We carry a variety of common over the counter medications for the occasional need. If you take an over-the-counter medication daily (for example, Claritin for allergies) you will need to bring your own supply.

- **Medical Equipment:**
 - For any medical equipment you may use, such as CPAP machines, Camp does not have any extra chargers, face/nose masks, power cords or distilled water. Please make sure you have everything you need. If you will need assistance with your medical device, our weekly health lodge staff will ask you to walk us through how the device works, common troubleshooting, and ask who to contact if there are problems

- **Questions?**
 - Contact our Healthcare Supervisor Amanda Dehli.
