

Wisconsin Lions Camp

Blood Glucose Treatment Protocols 2025

| BG Reading mg/dl | Treatment/Protocol | Specific treatment |
|------------------|---|--|
| Above 250 | Test ketones. Call on call cabin medical staff for consult with results. | Correction based on camper specific plan |
| 80-250 | No treatment needed, if the camper has a different routine, medical staff will work with them to figure out their management strategy and note it in their camper information form. | |
| 70-80 | 10 or 15 g. carbohydrate. Discuss with camper their treatment preference | 1 juice or 4 glucose tabs. |
| 50-70 | 4 oz. juice & an additional 15 g. Recheck at 15 minutes. Involve cabin medical staff if questions. | 1 juice + 1 granola bar |
| 49 or below | 8 oz. juice & an additional 15 g. Give treatment and immediately notify medical staff for monitoring. Recheck every 15 minutes until back to target range. | 2 juice + 1 granola bar |

- Treatment options also include access to protein all day – string cheese and beef sticks with special diet options.
- This is a general range, campers and staff will discuss specific needs of each camper upon arrival and throughout the week.
